#### **OBJECTIVE**

I am a software developer skilled in Java, Spring, JavaScript, Node.js, front-end tools, and user experience design. I love to develop seamless software. I am eager to work with a team where I can contribute my skills, learn new techniques, and grow in my career. I look forward to facing challenges that help me expand my knowledge and become a better develop.

#### **PROJECTS**

# Tracw - Secure Banking Application: [GitHub]

Tools: Java 21, Spring Boot, Spring Security, Spring Data JPA, H2 DataBase, Mayen

- Developed a secure banking application with **Spring Security** for authentication and role-based access control.
- Implemented Spring Data JPA for efficient database operations and used H2DataBase for data persistence.
- Designed RESTful APIs for handling transactions, user accounts, and financial records
- Built a user-friendly web interface using HTML, CSS, and JavaScript.

**Dynamic To-Do Management System:** A web-based application for managing personal tasks with real-time updates. [GitHub] **Tools:** JSP, Servlets, MySQL, HTML, CSS, JavaScript, Bootstrap

- Developed a secure user authentication system to ensure only authorized access to task data.
- Implemented AJAX for real-time task addition, updates, and deletion without page reloads, enhancing user experience.
- Created a dynamic task management interface with features for marking tasks as complete or incomplete, ensuring intuitive usability.
- Applied exception handling techniques to ensure **reliable database operations** and error-free task management.

**Faton Static Website:** A multi-page static website designed for an imaginary company. [GitHub] [website link] **Tools:** HTML, CSS, JavaScript, Bootstrap

- Developed a **static website** with sections for Homepage, Services, Projects, and detailed sub-pages.
- Designed responsive layouts for optimal user experience on all devices.
- Created interactive elements to effectively showcase services and projects.

#### **EXPERIENCE**

#### Freelance Web Designer and Developer [website Link]

Website Project for TravelLikee

- Designed and developed a comprehensive website using Wix Studio, tailored to meet TravelLikee's business goals.
- Implemented core features, including a user-friendly resort booking system and customizable resort listings.
- Delivered a responsive, SEO-optimized design to enhance user experience and accessibility.
- · Collaborated with the client to ensure alignment with branding and functional requirements.
