OBJECTIVE

Motivated and adaptable Software Engineer with a strong foundation in Java and backend development. Gained hands-on experience in designing backend architecture and scalable systems during my internship. Passionate about building efficient and fast-performing services using modern technologies. Eager to contribute as a Java Software Engineer or Backend Developer in a dynamic team environment.

SKILLS

- **Languages:** Java, JavaScript
- **Frontend:** React.js, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend:** Spring Boot, Spring Security, Spring Data JPA
- **Database:** MySQL, Basic PostgreSQL, H2
- **Version Control:** Git, GitHub
- **Tools:** Maven, Postman
- **Concepts:** RESTful APIs, Object-Oriented Programming (OOP), System Design Basics

EXPERIENCE

Software Development Intern | Firstbench.ai | April 2025 – June 2025

- Designed the backend architecture for a news summarization system using Java, Spring Boot, and PostgreSQL, optimizing speed and modularity using async processing.
- Took ownership of system design decisions, ensuring scalability and responsiveness by selecting appropriate technologies and following clean coding practices.
- Worked in close coordination with the React Native frontend team to align APIs for seamless integration, ensuring cross-platform compatibility in an agile setup.

PROJECTS

UPSC Blog Generator – AI-Powered News Summarization App [GitHub: [backend](#), [frontend](#)]

Tools: Java 21, Spring Boot, Spring Data JPA, REST APIs, React, Tailwind CSS, Gemini API, MySQL, Maven

- Built an AI-based blog summarizer converting NDTV news feeds into UPSC blogs using Gemini API.
- Developed async backend for fast, non-blocking blog generation and optimized DB access.
- Created a responsive React UI with category filters for smooth content browsing.

Tracw – Secure Banking Application [GitHub]

Tools: Java 21, Spring Boot, Spring Security, Spring Data JPA, H2 Database, Maven

- Developed secure login and role-based access control using Spring Security.
- Built REST APIs for account creation and transactions with exception handling.
- Designed backend logic and JPA models for smooth banking operations.

Dynamic To-Do Management System [GitHub]

Tools: JSP, Servlets, MySQL, HTML, CSS, JavaScript, Bootstrap

- Created a to-do manager with login, task tracking, and deletion features.
- Used AJAX for real-time updates without page reloads.
- Ensured secure sessions and stable DB operations with error handling.

EDUCATION

Indur Institute of Engineering and Technology

B.Tech in Computer Science | Siddipet, India | 2022 – 2025

Percentage: 62%

Government Polytechnic, Siddipet

Diploma in Electronics & Communication Engineering | 2019 – 2022

Percentage: 80%
